ATTN: Cathy Johnson

We as farmers live, breathe and cherish our farms ... soil, air, environment, water and lifestyle.

How many more gov't regulations do you think we have time to ~~just~~ include in our daily chores + jobs.

Farmers feed cities ... putting a hold on new farms will end up starving your cities. We soil + water sample + file them yearly ... how many city dwellers + golf courses do that? Rules can help or hinder a society ... what ^{more} do we want us to do and where are we to find the time + money.
