

To: CLEAN ENVIRONMENT COMMISSION

To whom it may concern.

I am Jodie Spence

Grade 10

What I think about this, "Clean environment commission." Is that it seems like a good idea, something new something fresh.

A project for hydro to accomplish, all every community needs is an upgrade upon where they live.

This Keeyask Hydro project already sounds like it's gonna happen so why not finish what you started. Give us individuals something interesting to look at, something where the view is beautiful.

If you don't try new things you won't know at the end.

No matter what the consequences are go what's already has been requested.

Do your job on what's right for our people, for our community as well.

I'm not saying the choices you individuals make are bad ideas. What I'm saying and trying to inform you is what makes the people happy is the opinion you should go with.

I just wanted my verdict to cross your mind while and that you're hopefully reading this.
