Subject: Manitoba Minnesota Transmission Project

To the C.E.C

I'm Romeo Poiron President of Ray-Mo Holdings Inc. land owner and tax payer in the RM of La Broquerie. I believe that the Manitoba Minnesota Transmission Project that is going to be erected in the area of La Broquerie should be moved to the east of the Rm of La Broquerie using Crown lands, so it doesn't effect the the people of the La Broquerie and R.M of La Broquerie. I believe that the people of LaBroquerie should have a say in where the MMTP should pass. In reality we are the ones paying for the construction of this project and WE should be heard and respected. I've raised my children here in the RM of La Broquerie and want to see my grandchildren to grow up here in a healthy and safe invironment.

I would like to see our schools grow with more students and possibly the schools to grw is size. I believe that if the MMTP would not pass through our community it would help to show our youth to be proactive our community decisions. To help show our children that when we stand together and work together we ca achieve great things.

As a developer i would like to see our economy stay strong and profitable. With the MMTP crossing in the middle middle of our community it will push family's away and the prices of properties down and less taxes for our community. and a one time payment to our community doesn't build sustainable economy. Reasonable decisions and the respect of the people does.

Thank You

Best Regards ; Romeo Poiron
