Her Honour  
The Honourable Janice Filmon, C. M., O. M.  
Lieutenant-Governor of Manitoba  
Room 235 Legislative Building  
Winnipeg, Manitoba  
R3C 0V8

Your Honour:

The undersigned has the honour to present the Annual Report of the Clean Environment Commission detailing its activities for the fiscal year ending March 31, 2016.

Sincerely,

Original signed by

Cathy Cox  
Minister

Office of the Chairperson  
Clean Environment Commission

305 - 155 Carlton Street  
Winnipeg, Manitoba

The Honourable Cathy Cox  
Minister of Conservation  
Room 333 Legislative Building  
Winnipeg, Manitoba  
R3C 0V8

Dear Ms. Cox:

Pursuant to the provisions of Section 6(10) of *The Environment Act* I am pleased to submit to you the Commission's annual report for the year ending March 31, 2016.

Submitted on behalf of the Commission.

Original signed by

Terry Sargeant  
Chair

# The Manitoba Clean Environment Commission

The Minister responsible for *The Environment Act* during the 2014-2015 fiscal year was the Honourable Tom Nevakshonoff. Commission membership consisted of a full-time chairperson and citizen appointees. They were:

Terry Sargeant (Chairperson)

Judy Bradley

Judy Head\*

Duncan Geisler<sup>Δ</sup>

Neil Harden

Brian Kaplan

Glennis Lewis<sup>Δ</sup>

Patricia MacKay\*

Aurelie Mogan

Wayne Motheral

John Neufeld

Reg Nepinak

Jim Shaw

Muriel Smith

Bev Suek

Edwin Yee

\* Until June 2015

<sup>Δ</sup> Appointed June 2015

## **Role and Responsibilities**

### **Mandate**

The Clean Environment Commission is established under *The Environment Act* (1988) to provide an avenue through which the public can participate in the decision making process regarding the environment in Manitoba. The commission also provides advice and recommendations to the minister and plays a role in the application of *The Contaminated Sites Remediation Act* and *The Drinking Water Safety Act*.

Commission membership includes a full-time chairperson and part-time commissioners appointed by Order-in-Council. Commissioners come from a wide variety of backgrounds and disciplines as well as different regions of the province.

The Commission may engage in the following activities to assist in environmental management.

### **Public Hearings**

As part of the provincial environmental assessment process, the public is invited to submit comments and/or objections regarding a proposed project through the Public Registry. In response to valid concerns, the Minister of Conservation and Water Stewardship may request the Clean Environment Commission to convene a public hearing. During such a hearing the commission receives representations from the project proponent and the general public—both supporters and opponents. The commission reviews the evidence and information presented at the hearing and prepares a report containing advice and recommendations for the minister.

Upon receipt of the commission's report, the minister may choose to accept all or part of its recommendations but is under no legal obligation to do so. If, however, the commission's recommendations are not acted upon, or incorporated into the licence under review, written reasons must be provided by the Minister or the Department of Conservation and Water Stewardship and these must be filed in the Public Registry.

In addition to licensing matters, some environmental issues require public involvement before government policy can be developed. In these cases, the Minister of Conservation and Water Stewardship can request that the commission convene a hearing to gather public opinion.

Manitoba Conservation and Waterstewardship has also signed onto a Canada-Manitoba Agreement on Environmental Assessment Cooperation with Environment Canada. As part of this

agreement, regarding projects where there is also federal jurisdiction, a process is set out respecting joint review. Commission hearings may be used as a source of information for the federal review or there may be a joint review panel formed for specific projects. Commission members would be part of these panels.

## **Investigations**

*The Environment Act* allows the commission to investigate any matter of environmental concern and to provide advice and recommendations to the Minister of Conservation and Water Stewardship.

## **Mediation**

The commission can provide mediation services to parties involved in an environmental management dispute. These activities are undertaken at the request of the Minister of Conservation and Water Stewardship. The commission reports to the minister regarding the outcome of any mediation exercises in which it becomes involved.

# Rôle et responsabilités

## Mandat

La commission de protection de l'environnement a été établie en vertu de la *Loi sur l'environnement* (1988) afin d'offrir un moyen au public de participer au processus décisionnel en ce qui a trait à l'environnement au Manitoba. La commission fournit aussi des conseils et des recommandations au ministre et joue un rôle dans l'application de la *Loi sur l'assainissement des lieux contaminés* et *Loi sur qualité de l'eau potable*.

La commission est composée d'un président à plein temps et de commissaires à temps partiel nommés par décret. Les commissaires représentent des disciplines et des horizons différents et viennent aussi de différentes régions de la province.

La commission peut entreprendre les activités suivantes afin d'aider à la gestion environnementale :

## Audiences publiques

Dans le cadre du processus d'évaluation environnementale provinciale, on invite le public à présenter des commentaires ou des objections concernant un projet proposé par le truchement du registre public. En réponse à des préoccupations justifiées, le ministre de la Conservation and Water Stewardship peut demander à la commission de protection de l'environnement d'organiser une audience publique. Pendant une telle audience, la commission reçoit des observations du promoteur du projet et du grand public (partisans et opposants). La commission examine les éléments de preuve et les renseignements présentés lors de l'audience et prépare un rapport contenant des conseils et des recommandations à l'intention du ministre.

Une fois qu'il a reçu le rapport de la commission, le ministre peut choisir d'accepter une partie ou la totalité des recommandations, mais n'est nullement tenu de le faire en vertu de la loi. Cependant, si aucune mesure n'est prise suite aux recommandations de la commission, ou si ces dernières ne sont pas incorporées dans la licence examinée, le ministre ou le ministère de la Conservation and Water Stewardship doit fournir des raisons écrites qui seront versées dans le registre public.

En plus des questions de licence, certaines considérations environnementales requièrent la participation du public avant qu'une politique gouvernementale puisse être élaborée. En pareil

cas, le ministre de la Conservation and Water Stewardship peut demander à la commission d'organiser une audience afin de recueillir l'opinion du public.

Manitoba Conservation and Water Stewardship a aussi signé une Entente Canada-Manitoba d'harmonisation de l'évaluation environnementale avec Environnement Canada. Dans le cadre de cette entente, lorsqu'un projet relève aussi du gouvernement fédéral, un processus est établi relativement à un examen conjoint. L'examen fédéral peut utiliser les audiences de la commission comme source de renseignements, ou on peut créer un comité d'expertise conjoint pour des projets précis. Les membres de la commission font alors partie de ces comités.

## **Enquêtes**

La *Loi sur l'environnement* autorise la commission à procéder à des enquêtes à l'égard de questions portant sur l'environnement et à fournir des conseils et des recommandations au ministre de la Conservation and Water Stewardship.

## **Médiation**

La commission peut fournir des services de médiation à des parties opposées dans un différend portant sur la gestion environnementale. Elle entreprend ces activités à la demande du ministre de la Conservation and Water Stewardship, puis lui rend compte des résultats de chaque médiation.

## Message from the Chairperson

The year 2015-16 was, once again, a busy year for the Clean Environment Commission.

As has been the case for, at least, the past five years, the commission's work has focused, almost exclusively, on Manitoba Hydro projects.

Following the proceedings for the Bipole III Transmission Project, which concluded in 2013, and the Keyask Generation Project, which concluded in 2014, the commission turned to the deliberations for Lake Winnipeg Regulation. These proceedings carried on through the latter part of the 2014-15 and for almost one-half of this reporting year, with our report being sent to the minister in September 2015.

In August 2015, the minister referred the Regional Cumulative Effects Assessment to the commission. This assessment, conducted jointly by the Manitoba Department of Conservation and Water Stewardship and Manitoba Hydro, arose out of a recommendation in the commission's report on Bipole III. This review will include public outreach in a number of communities affected by hydroelectric development in northern Manitoba over the past 50+ years. Preparatory work continues. Hearings could commence by late-summer 2016.

In December 2015, the minister referred Hydro's proposed Manitoba-Minnesota Transmission Project to the commission for public review. As the final documentation is not yet available, only very preliminary work had been completed by the end of the reporting year.

For a number of years, the commission has been designated as the appeal body for certain matters under *The Contaminated Sites Remediation Act*. For many years, this resulted in no involvement by the commission. However with recent amendments to the statute, there were indications, late in the reporting year, that some matters under this act will be referred to the commission.

As I have written in past reports, the Clean Environment Commission takes very seriously the important role in environmental protection given it by *The Environment Act* of Manitoba. The commission seeks to fulfill this mandate, in part, by offering advice that we believe will contribute to improving the art and science of environmental assessment, which, in turn, will better protect the environment. Positive steps in this regard continued in the past year.

The commission also notes that other important policy and legislative initiatives, at least in part, sparked by past commission recommendations have been undertaken by the Province. These and other initiatives lead the commission to believe that environmental assessment in Manitoba appears to be headed in a very positive direction.

There were only a few changes to commission membership in the past year. Long-time members Judy Head and Patricia MacKay left the commission in June 2015, with new members Duncan Geisler and Glennis Lewis being appointed at the same time.

As always, the commission looks forward to continuing to play its role in ensuring the environmental protection of Manitoba in the coming year.

***Terry Sargeant***

## Message du président

L'exercice 2015-2016 s'est avéré encore une fois bien rempli pour la commission de protection de l'environnement.

Tout comme cela a été le cas depuis au moins les cinq dernières années, le travail de la commission était axé, presque exclusivement, sur des projets de Manitoba Hydro.

À la suite des délibérations pour le projet de ligne de transmission Bipolaire III, qui se sont terminées en 2013, et pour le projet de centrale de Keeyask, qui se sont terminées en 2014, la commission s'est consacrée aux délibérations pour la régularisation du lac Winnipeg. Ces dernières ont eu lieu vers la fin de 2014-2015 et pendant presque la moitié de l'exercice sur lequel porte le rapport, celui-ci ayant été envoyé au ministre en septembre 2015.

En août 2015, le ministre a confié l'évaluation des effets régionaux cumulatifs à la commission. Cette évaluation, menée conjointement par le ministère de la Conservation et de la Gestion des ressources hydriques du Manitoba et Manitoba Hydro, découle d'une recommandation figurant dans le rapport de la commission sur Bipolaire III. L'évaluation comprendra des consultations publiques dans un certain nombre de collectivités touchées par le développement hydroélectrique dans le nord du Manitoba au cours des cinquante dernières années et plus. Les travaux préparatoires se poursuivent. Les audiences pourraient commencer d'ici la fin de l'été 2016.

En décembre 2015, le ministre a transmis le projet proposé de transmission Manitoba – Minnesota à la commission pour un examen public. Comme les documents finaux ne sont pas prêts pour le moment, seulement des travaux très préliminaires ont pu être terminés avant la fin de l'exercice faisant l'objet du rapport.

Pendant un certain nombre d'années, la commission a été désignée comme organisme d'appel pour certaines affaires en vertu de la *Loi sur l'assainissement des lieux contaminés*. Pendant beaucoup d'années, la commission n'a pas été consultée à ce sujet. Toutefois, en

raison des récentes modifications à la *Loi*, il y avait des raisons de croire, en fin d'exercice, que certaines affaires en vertu de cette loi seront renvoyées à la commission.

Comme je l'ai écrit dans de précédents rapports, la commission de protection de l'environnement prend très au sérieux le rôle important de protection de l'environnement que lui confère la *Loi sur l'environnement* du Manitoba. La commission s'efforce de remplir son mandat en partie en donnant des conseils qui, pensons-nous, contribueront à améliorer l'art et la science de l'évaluation environnementale, laquelle, à son tour, améliorera la protection de l'environnement. Des avancées positives à cet égard ont continué de se produire au cours du dernier exercice.

La commission constate également que la Province a entrepris d'autres initiatives importantes en matière de politiques et de mesures législatives qui découlent, au moins en partie, de précédentes recommandations formulées par la commission. Ces initiatives, parmi d'autres, incitent la commission à penser que l'évaluation environnementale au Manitoba semble prendre une direction très positive.

Il n'y a eu que quelques changements concernant les membres de la commission l'année dernière. Mesdames Judy Head et Patricia MacKay, des membres de longue date, ont quitté la commission en juin 2015 et Monsieur Duncan Geisler et Madame Glennis Lewis ont été nommés membres pendant la même période.

Comme toujours, la commission se réjouit à l'idée de continuer l'année prochaine à jouer son rôle visant à garantir la protection de l'environnement du Manitoba.

***Terry Sargeant***

## Hearings

### Lake Winnipeg Regulation

On July 5, 2011, the Minister of Conservation, at the request of the Minister of Water Stewardship, issued a reference to the Clean Environment Commission regarding the regulation of Lake Winnipeg under *The Water Power Act*. The commission has been asked to review the application by Manitoba Hydro for a final licence for the project. The request included the following Terms of Reference:

1. Review the broader public policy rationale regarding the regulation of lake levels on Lake Winnipeg in effect at the time leading up to the issuance of the Interim Licence in 1970.
2. Hear evidence from Manitobans regarding the effects and impacts of Lake Winnipeg regulation since the project was put into commercial use by Manitoba Hydro on August 1, 1976.
3. Review the successes and failures of the implementation of those broader public policy goals that led up to the issuance of the Interim Licence and the construction and subsequent operation of the project.
4. Summarize and make comment on the concerns raised pertaining to the issuance of a final licence to Manitoba Hydro under *The Water Power Act* including but not limited to future monitoring and research that may be beneficial to the project and Lake Winnipeg.

Planning for this project began in 2011-2012 and it was soon realized that additional information would be required to undertake a review that included the components set out in the Terms of Reference. The commission requested this additional information from Manitoba Hydro. A report with the requested information was delivered to the Clean Environment Commission on July 31, 2014.

The four person review panel consisted of Terry Sargeant (Chairperson), Neil Harden, Bev Suek and Edwin Yee.

The hearings were held, beginning on January 12 through to May 1, 2015, at 20 communities near Lake Winnipeg or downstream along the Nelson River, and in Winnipeg. Hearings were held in Thompson, Wabowden, York Factory First Nation, Misipawistik Cree Nation, Fisher River Cree Nation, Pine Dock, Peguis First Nation, Ashern, Grand Marais, Brokenhead Ojibway Nation,

Selkirk, Gimli, Manigotagan, Black River First Nation, Sagkeeng First Nation, Pimicikamak Okimawin, Cross Lake, Norway House Cree Nation and Norway House. The hearing record was closed on May 8, 2015.

Hearings were informal, where anyone could present their views and experiences. To allow meaningful input there was funding available to groups and individuals to prepare their comments. Fifteen groups, Indigenous and other organizations and First Nations received a total of \$453,498 through the Participant Assistance Program. Approximately 300 individuals provided oral testimony and fifteen written submissions were received.

The panel provided 34 recommendations, covering a wide range of issues that include watershed management, modeling, monitoring methodologies, mitigation methodologies and practices, licensing practices and compliance and future planning.

The review of Lake Winnipeg regulation underlined, for the commission, the need for Manitoba to address a wide range of watershed management issues affecting Lake Winnipeg and the Nelson River. It also prompted the commission to recommend a roadmap for future relicensing reviews for other Manitoba Hydro projects. The intent of the roadmap is to help to assess the past and current impacts of these projects and develop operational rules for them that could mitigate or reduce future impacts and balance economic, social and environmental concerns.

The commission also concluded that, based on the evidence it saw and heard, Lake Winnipeg regulation has reduced the extent of flooding that would have been experienced on Lake Winnipeg during the heavy precipitation years of the last two decades. On the other hand, the project caused a variety of environmental and socio-economic concerns downstream of Lake Winnipeg along the Nelson River. Many of these impacts have been the subject of past and on-going negotiations and compensation under the Northern Flood Agreement, and other agreements.

## Regional Cumulative Effects Assessment

On August 20, 2015, the Minister of Conservation and Water Stewardship, provided a reference to the Clean Environment Commission requesting that it conduct public outreach activities regarding the report, that was completed by Manitoba Hydro and the Manitoba government, for the Regional Cumulative Effects Assessment for the Churchill, Burntwood and Nelson river systems.

In its 2013 report on the Bipole III Project, the Clean Environment Commission made the following recommendation:

“Manitoba Hydro, in cooperation with the Manitoba Government, conduct a Regional Cumulative Effects Assessment for all Manitoba Hydro projects and associated infrastructure in the Nelson River sub-watershed; and that this be undertaken prior to the licensing of any additional projects in the Nelson River sub-watershed after the Bipole III project.”

This recommendation was accepted by Manitoba and a Terms of Reference for a regional cumulative effects assessment of hydroelectric developments was agreed to by Manitoba and Manitoba Hydro in May 2014. It should be noted, the scope was expanded to include areas beyond that identified in the commission’s recommendation to include the Churchill, Burntwood and Nelson River systems. The study was completed in two phases. The first phase was completed in May 2014, and included a compilation of available data and a description of the assessment approach to be used to analyze the data in the second phase. The second phase report was released in December 2015.

The request included the following Terms of Reference:

1. To review the final Phase I and Phase II reports on the regional cumulative effects assessment;
2. To carry out a Participant Program with funding available;
3. To invite affected communities – First Nations and other identified in the assessment area, as well as the Manitoba Métis Federation – to public meetings to provide an opportunity for them to offer input on the regional cumulative effects assessment, including its accuracy in presenting past and current effects and community perspectives and concerns, and to identify any additional information relevant to the assessment;

4. To facilitate a web-based review of the final Phase II report for interested parties outside the Region of Interest;
5. To hold a public meeting in Winnipeg to allow interested parties outside the Region of Interest to present summaries of their written comments on the final Phase II report; and
6. To prepare and file a separate report with the Minister of Conservation and Water Stewardship summarizing what was heard from participants during the course of the public outreach program, including any comments received through the web-based review. The report should be filed within four months from date of completion of the meetings.

A review panel has been convened and preparations were in progress as of March 31, 2016. The results will be reported on in a future annual report.

## **Manitoba-Minnesota Transmission Project**

On December 31, 2015, the Minister of Conservation and Water Stewardship provided a reference to the Clean Environment Commission requesting it conduct public hearings on the proposed Manitoba-Minnesota Transmission Project. The request included the following Terms of Reference:

1. To review the EIS, including the proponent's public consultation summary. Note that a detailed technical review will be completed by provincial agencies who are members of the TAC. Federal specialists will also be invited to provide comments on the project as part of the TAC review. Documents produced during this assessment should be considered by the commission as input for the hearings.
2. To hold public hearings for the commission to consider stakeholder and public input; and
3. To prepare and file a report with the Minister of Conservation and Water Stewardship outlining the results of the commission's review and providing recommendations for the Minister's consideration. The report should be filed within ninety (90) days from the date of completion of hearings.

Preparatory actions were in process as of March 31, 2016. The results will be reported in a future annual report.

## **Investigations**

No investigations took place in 2015/16.

## **Other Activities**

### **Professional Development and Training**

Commission members and staff attended workshops and conferences that provided professional development in the area of tribunals and hearings, environmental assessments and current environmental topics and issues. Examples of the workshops and conferences included: 31<sup>st</sup> Annual Canadian Council on Administrative Tribunals Conference, Manitoba Council of Administrative Tribunals (MCAT) Tenth Annual Conference, “new members” training workshops, Supreme Court Justice Rothstein presentation, the 22<sup>nd</sup> North American Wildlife Conference, a Saskatchewan River Conference – From Rivers to Oceans, Canadian Water Resources Association national conference and many of their luncheon information presentations on water related issues.

The Lake Winnipeg Research Consortium hosted a tour on Lake Winnipeg on the Namao, where many commission members attended and thoroughly enjoyed seeing science in action first hand.
