“Jackhead Fishery Reserve 1900”

To begin we are signatories to treaty 5 which our ancestors historically signed in 1875 in the central east and west shore's of Lake Winnipeg. Historically they agreed to certain terms and conditions which the government of the day has grossly violated. In terms of sustainability, environment and conservation has done great harm to our homeland as well as fish water, animals and birds. The Royal Proclamation of 1763 and the Indian Act of 1871 along with Natural Resources Transfer Act of 1930 took over control of our, lives and land with out consultation to the native communities. Recovery process is not going to happen in one year or maybe not in a hundred years. The “creator”

gives us our breath of life, along with that to balance our lives with nature. We live with one of oldest religions in the western hemisphere which is the sacred fire and our holy medicines along with our sacred sites. In closing as a fisherman and grandfather, I am deeply concerned every day for my grandchildrens future.
