March/2007

Manitoba Clean Environment
305 - 155 Carlton St.
Winnipeg M.B.

EXHIBIT NUMBER: WSOB-008
File Name: Hog Review
Date: April 3, 2007
Received by: [Signature]
(Commission Secretary)

Provincial Government.

To maintain a clean environment, water, & air, it is extremely important to keep pollutants out of them.

Pigs barns were let go up by a whim of one man in our area, (that being the reeve of RM. of Turtle Mtn.) He held meetings at 8 o'clock in the morning, without much notice to general public or to those being affected in the long run was not just someone 1 mile away, but 12 miles away. Also the river run into the town and carried all its excess wastes into it. now we are affecting over 3,000 residents.

You the Provincial government has put a stop on building any more barns for time being, but it should be permanent. They still have cattle. Greedy farmers do not care, what effects this has on our water or air.

2.

or the water that now being fed into the Lake where they are getting their water. Until of course it gets algae in it.

It just takes a shortage of rain as we had in 2006 to pollute the lake.

I see also the Lake Winnipeg had algae bloom in it.

One pig farmer said he would just go to Florida with big million dollars he was going to make out of these pigs.

Oh I said you know the beach combbers in Florida are complaining about all the noise the pigs make there. They have them in outside pens there so when one pig squeals they all do.

Real prosperity is when you don't have to go anywhere for a holiday, but stay in your own back yard, that you have kept clean. That is worth far more than dirtying our rivers & stinking our air for dirty money.

My Grandfather purchased

3
land here, was very concern-
ed about it back then. I
would like to think it can
be left for other generations
clean as when I lived out
on it. pure spring water, fresh
air, keeping fields off the
river. This makes for an area
for wildlife, birds that give
us our true sense of well
being & happiness. Nothing
could be more important than
preserving that.

Durly those who are in
your position can see that and
will see to it we maintain
our greatest wealth.

Shirley D. Keyes.
