To: Clean Environment Commission
RE: Keeyask Hydro Project

My name is Colan Rass, I am 14 years old and I am in grade 10. This is what I think about this Dam, I think its a bad thing because us community alot of stuff is happening when the first Dam came in, it is affecting the lands even the trees are falling down because of the water levels it is going higher and lower and the medicine is on the trees and Clean Environment Commission damaged about of thing like houses are falling when the water level come up. This one time are roads almost collapsed guess why it did because of the Dam and the clean Environment commission are trying to built another Dam in Split Lake now. I say it is a bad idea to built this dam because it will affect us and there community.
