

To: The Clean Environment Commission or (CEC).

What do I think? I think a new dam is good but it will raise the water higher than before. It will damage our lands, plants, fish, and recreation, or maybe our town will flood a little bit then our roads will flood and cut off. And it will destroy our woods on our town and in the woods that me and my family our camp site it destroy our good fire wood then we have to leave. Maybe the project will help our first/Cree nations but will not help the land that we live on. I just read it flooded land area it 45 square kilometres. That won't help our home or land it just destroy it. Our recreation will be gone too, the fishing and boating will be also gone. We fishing for our food and jobs, to be honest I don't like smell of dead fish and I do like eating the food. So I don't agree with the Project.

I am Konroy Umpherville and I am in Grade 12.
