RE: Keeyak Hydro Project

Hi, I am a student from Otter Nelson River School. I am in Grade 11. My Thoughts about the Keeyask Hydro Project is that this is a bad idea. It is a bad idea because this project is going to damage the land, water, animals, recreation, plants, and medicine etc. Why are they building another Dam? They did badly enough in Jenpeg. The Jenpeg Hydro destroyed a lot of stuff. They found bones of our ancestors that were buried in the ground, killed a lot of animals, and our people are wasting money on electricity.

These people that are going to make this project don't care about anything. They tell everyone that it's going to be fine but they lie. They are just going to destroy the Environment and make money out of it. We need to stop this for our future children. This is a big deal for our future. Do everything as you can to stop them and I Thank you for doing it.

Thanks from a student at Otter Nelson River School.
