

**TO: CLEAN ENVIRONMENT COMMISSION (CEC)**

**RE: Keeyask Hydro Project**

**Hi my name is Tammy Ross. I am a student from Otter Nelson River School. I am in grade 11. This is what I think of you guys building this dam. I really think it is a bad, because well it really affected us as a community. We`ve experienced the flooding in 2011. It really got to us the water was over flowing a lot it started to break our roads. We started school late in October. We couldn`t take the bus to school because the roads were really bad. A lot of students from the community had to walk to school that is because of how damaged the roads were. These DAMS are ruining our communities, and our water, and our land.**

**Our people were scared to go on boat rides because they were scared to hit a rock. Our land was beautiful until you people came and build a Dam. We`ve experienced a lot of deaths in our community because of how high the water levels were. And because the currents were getting bigger ever time the water was high. We also had a lot of beautiful animals surrounding our community, but now where are they? Sometimes hunters don`t get to go hunting because of water levels. Our people have been through a lot. And our people even found bones of our ancestors on the shorelines. We can`t even do a lot of our traditional ways because of the all the damage in our community, and because of the water levels.**

**WHY WOULD YOU EVEN MAKE ANOTHER DAM WHEN YOU ALREADY MADE ENOUGH DAMAGE????**

**Sincerely yours....**

**Tammy Ross**
