1. PROJECT DESCRIPTION

The Manitoba Metis Federation (MMF) is participating in the regulatory process for the Manitoba-Minnesota Transmission Project (MMTP).

Manitoba Hydro is proposing to construct and operate a 500 kilovolt (kV) alternating current (AC) international power line (IPL). It will also include upgrades to three associated transmission stations at Dorsey, Riel and Glenboro South. Subject to regulatory approvals, the Project has an in-service date of 2020.

The Project will originate at the Dorsey Converter Station, located near Rosser, northwest of Winnipeg. It will head east along an existing Transmission Corridor to just south of Anola. From south of Anola the line will continue southeast along a new Right-of-Way (ROW), crossing the border near Piney.

This new ROW will have a width of 80 m for self-supporting towers and 100 m for guyed towers. In cultivated agricultural areas, the line will be mainly self-supporting lattice steel structures to mitigate effects on agricultural and rural residential land use. In non-agricultural areas the transmission line will be constructed of primarily guyed lattice steel structures for cost savings, and to mitigate effects of tower stability due to saturated soils.

2. PARTICIPANT CONSENT AND RELEASE

This Manitoba Metis Federation (MMF) Survey (the Survey) is designed to look at the *preferred conditions* for harvesting and document land that is *not compatible* with those harvesting activities.

I agree to participate in this survey with the understanding that the interview process can be terminated at any time should I become uncomfortable with a line of questioning.

I understand that the purpose of this survey is to assist the MMF in gathering information on Metis Specific Interests and to ascertain if, and the manner in which, the development of the MMTP might impact any identified Metis Specific Interests. I understand that the MMF will produce a report (the Report) based on the results of the Survey.

I understand that following its production the Report will undergo a community verification process in which I will be invited to participate.

I understand that the Report will be provided to Manitoba Hydro and that Manitoba Hydro will file the Report with the relevant regulatory authorities.

I understand that the Report will protect my confidentiality and that it will not include the names of individuals or personal information. I understand that the information gathered in the Survey and collected in the Report may be verified by a third party of Manitoba Hydro's choosing, who will also be required to protect my confidentiality.

I agree that the information gained from this survey can be used by the MMF to support MMF research, regulatory interventions, court actions, negotiations and legal work, projects and initiatives.

All information collected is the sole property of the MMF, and will not be used for any purpose without MMF consent.

1. CONSENT

This Manitoba Metis Federation (MMF) Survey (the Survey) is designed to look at the *preferred conditions* for harvesting and document land that is *not compatible* with those harvesting activities.

I agree to participate in this survey on the understanding that the interview process can be terminated at any time should I become uncomfortable with a line of questioning.

I understand that the purpose of this survey is to assist the MMF in gathering information on Metis Specific Interests and to ascertain if, and the manner in which, the development of the MMTP might impact any identified Metis Specific Interests. I understand that the MMF will produce a report (the Report) based on the results of the Survey.

I understand that following its production the Report will undergo a community verification process in which I will be invited to participate.

I understand that the Report will be provided to Manitoba Hydro and that Manitoba Hydro will file the Report with the relevant regulatory authorities.

I understand that the Report will protect my confidentiality and that it will not include the names of individuals or personal information. I understand that the information gathered in the Survey and collected in the Report may be verified by a third party of Manitoba Hydro's choosing, who will also be required to protect my confidentiality.

I agree that the information gained from this survey can be used by the MMF to support MMF research, regulatory interventions, court actions, negotiations and legal work, projects and initiatives.

All information collected is the sole property of the MMF, and will not be used for any purpose without MMF consent.

Questions or concerns can be directed to Adena Vanderjagt at 403-796-3897 or adena.vanderjagt@calliougroupp.com
