Subject: Sio silica

Dear Sr/Madame,, please be very careful of giving a go ahead to this very dangerous project in the R.M. of Springfield precisely in Vivian Manitoba. I live in the R. M. Of Springfield and do not want the project to go ahead for many reasons, the aquifer needs to be protected and our water supply needs to be protected,, wildlife is losing places to live with all the developments so they are starting to live in our back yards ,, trees will be affected with the water quality and all the water for many miles will be affected,,many people will get very ill,, this is not natural. The run of water will cause a disaster to the area ,, has it been thought out in every angle, where is the run off water going to go,, I was unable yo make meetings but I am here now asking for many thoughts on this project to not be approved.
Mavis Druxyk
