To The Clean Environment Commission,

I am STRONGLY opposed to the proposed silica mine in Vivian Manitoba. Mining has no place in a drinking aquifer! I live in the area and am very concerned that this mine will put my water along with all the people in the area's water at risk. I am reminded of environmental disasters like Flint Michigan and the BP oil spill in the Gulf of Mexico where money and profit were put ahead of peoples health and environmental protection. You cannot live without water and if this mine contaminates the aquifer there is no fixing it!! The cost in hindsight will be astronomical. It is just not worth the risk. You are the Clean Environment Commission, your mandate is to protect not harm!
