Please see the attached letter to register my comments regarding this project. I sincerely hope that you get the proper science, and take into regard the feelings of people who have lived in the area for years, and whose water could be affected by this project in years to come. With all the problems Canada already has in supplying fresh water to all its citizens, and all I keep hearing on the news about 'Water Protection Initiatives', I am appalled and very sorry this risk to our water is even being considered.

Sincerely,
Deanne Miller
