To whom it may concern;

I would like to express my opposition to this Sio Silica project.

If those responsible will give their blessing for this to happen, then all hospitals should stock up on antidotes for arsenic, communities need to figure out how to haul water in, and Winnipeg hospitals need to begin a strategic plan for the skyrocketing cases of Silicosis that are bound to happen. Manitoba has some, if not the most, pristine water in the world. Water is going to be more precious than any other element in the near future. Shame, shame for allowing out of province companies that may end up selling this project to foreigners to do this to Manitoba. No wonder Manitobans are thought of as country hicks and not very smart.

Why are you planning on destroying this precious resource?

Regards,

Lynnette Nathaniel
