To whom it may concern,

My name is Garth Allan and I am a citizen in the R.M. of Springfield, Manitoba. I would like to present my concern over the Sio Silica Corp's motion to go ahead with their plans to extract silica sand with possible environmental disasters, such as the contamination of our groundwater not being taken into serious consideration. There is little evidence put forward that addresses the concerns raised at the meetings and I believe it is irresponsible to go forward with their plans. There is too big of a risk and no way of undoing the impacts of contaminating our drinking water for generations to come. This facility is too close to having negative residential impact.

I would like this email to be taken as my opinion on the matter that Sio Silica Corp should not proceed.

Thank you,

Garth Allan
