This is an insane extraction plan. Conservatives who want this industry project to go ahead are going to contaminate our aquifers forever, turn vast swaths of land into pitted unusable fields of destruction forever, kill and displace habitat and our wildlife forever...contaminate this region and beyond forever!!! In exchange for what? Industry profiteering, a handful of jobs, political benefits?
Conservatives = Contamination is going to be the legacy. No water - no life, period. We fall down.

Surely you drink water? have children or grandchildren whom you wish to see thrive?

Truly your mission and role on this commission is to protect the public interest of ALL Manitobans and our public goods - our environment. Water is our commons. Water is of interest to all and essential to all life forms. Water belongs to us all, therefore you are obligated to protect this shared resource for our commonwealth, indeed for our survival. Do your job and make Manitobans proud by rejecting the proposed silica mining project as the risks to our lives are too high.

I am a mother of 3 children who relies on well water in southwest Manitoba, on the Pembina Aquifer (we need limits on water extraction). You have to take seriously the protection of OUR precious ground water

Respectfully,

Gabriela Rodrigues
