Good morning,

I am against the proposed Sio Silica project in Manitoba. I reside in the Rm of Springfield and the potential effect it has on our aquifers is very troubling. There is not a clear enough proposal on what the company will to protect these and therefore think it should be stopped.

Please consider this when making a decision. Our lives, and the lives of future generations (including plants and animals) who call these lands home will be affected by this potential disaster.

Thank you,
Meagan
