Good morning ..

So looking at the pamphlet..I have some questions

I get jobs will be available however what are other benefits.

1 mistake..which will happen..human error is always going to be the downfall..but what are the consequences of that 1 mistake?

Are there benefits to the neighborhood around or the community itself.

Call me [REDACTED] for a discussion or email to answer and offer any positives ..exclude jobs as that isn't an asset as all areas are desperate for ppl.

Other question states on the pamphlet no fracking however this particular type of sand is used in a process known as hydraulic fracturing, pls advise the discrepancy on the phamlet

Regards  
Alex
