I am writing to voice my complete opposition to the proposed project by Sio Silica. All credible evidence points to a disastrous result for our aquifers that will be beyond repair. On top of that the pollution to the air which will result in terrible health issues makes the project that much worse. The cost for infrastructure damage to roads etc will be on the shoulders of Manitobans, while any money the company makes will leave the province. The Government of Manitoba has completely dropped the ball in doing their part to look into the harmful effects of this catastrophe or for that matter to even make our citizens aware of the damage it will cause.

R Hartle
