Hi! My name is Hunter Mustard. I am 20 years old and have lived in my home my whole life. I live here with both my parents and 7 siblings. Ranging from 23 to 3 years old.

Sio Silica is hoping to set up shop directly behind our property within 100m of our land.

I enjoy the country life. As I get older I realize there is nowhere else I'd rather be.

My parents bought this property for the future of myself and my siblings. With the cost of everything going up and no relief in sight many young adults my age can't afford to move out of their childhood homes.

I intend to live here for my whole life as there are multiple dwellings on our 116 acres. I have already planned out renovating one of the homes and have spent countless hours helping to keep and maintain the yards.

If our land is left unlivable and I mean water contamination, and or lack of water, or unsafe air to breathe, where will that leave my family?

My family may not be able to stay together. My older brother, my younger sister, and I all have permanent full time jobs in Winnipeg. My parents may have to choose to move to another province. This will break up our very close knit family!

Where is that going to leave the 3 oldest? To try to make ends meet in Winnipeg?

My 15 year old sister has 2 and a half years of high school left, is she going to be forced to move and lose all those strong and meaningful relationships with not just her friends but her teachers to?

All of our country living will be lost.

I enjoy quading, fishing, and hunting. Last summer I bought my very first dirt bike. I don't think I can ride a bike like that in Winnipeg.

I won't be able to enjoy our completely dark skies with twinkling stars.

My friends come out to our place from the city to enjoy bonfires with me and the beautiful surroundings.

I can't broaden my intelligence with the nature and the special things it has to offer.

Where am I going to target practice? I also don't think my neighbors in Wpg would appreciate

me skinning a deer or hanging one to process it for all to see.

If I'm forced into an apartment, well everything that I am made up of and used to doing will cease to exist. All the things I LOVE so much will be lost.

If this processing facility gets the green light it will affect my right to live where I want to and I don't want that taken away.

I am Opposed to this project!

Thank You
Hunter Mustard
