Dear Commissioners,

My husband used to live in Red Lake, Ontario and travelled many times to South Bay Mines, 70 Km Northeast of Ear Falls, Ontario and he was just reading an article on the Leakage of Toxic Chemicals leaking into 3 nearby lakes and now moving on to the Fourth, there is no long term solution to stopping this process of polluting our precious water systems and therefore, I ask that you please do not grant Silica Sand Extraction Company to destroy our precious water system as well as the community, wildlife, natural forest and peace and tranquility we enjoy living in the community of Anola. Stop this destruction before it is too late and there is no turning back the hands of time to give us back what they will have robbed us of.

Sincerely,

Annette Borhardt
