To whom it may concern:

I am writing this with deep concern over the proposed Silica sand project for eastern Manitoba.

Past mining projects along with much environmental research have proven that this can be detrimental to our water table, and as a new resident to south eastern Manitoba, I feel we should have a say. I have two very young children. What are we teaching them about their worth and our priorities as a society? Their health and ours is of the utmost importance.

I do not support this project. I do not think this type of work needs to be done in a highly populated area, with many of the nearby residents on well systems, who it will surely affect.

Sita Hajzler
