This project has too many unfavourable views...a rejection some 11 or 12 years ago...unfavourable views again at present as it affects the population involved..And the fact three projects for silica sand/solar windows are proposed at present. The production of solar windows is valid but not at the expense of private citizens who own this land upon which the developer wants to place his for-profit-development!

I object any further development of the Vivian sands project.

Perhaps it is time to enlighten the public of the other two projects under study using silica sand for solar window production. Again, I strongly oppose this Vivian project.
