To whom it may concern:

I am writing this with concern over the proposed Sio Silica sand project in Vivian, MB.

Past mining projects along with much environmental research have proven that this type of construction can have devastating effects on the environment, even more specifically ground water, which so many people in the area consume. As a resident of the surrounding area, and a parent of two very young children, I feel it is my duty to contest this project and the harm it will surely bring to all of us. What are we teaching our children about their worth, and our priorities as a society? Does progress trump the quality of life and people's health?

I do not support this project. I do not think this type of work needs to be done in a highly populated area, with many of the nearby residents on well systems, who it will surely affect.

Jonathan Broeska
Resident of La Broquerie, MB
