Attn: Clean Environment Commission

Regarding Sio Silica & the Vivian Project,

The climate crisis is upon us and as I have shouted for years, we cannot solve it within a vacuum. To implement, at this scale, such new (newness is to be debated) and untested extraction is terrifying. I have read the documentation and all I can say is it has specificity in its vagueness, propped up by pretty words like “environmentally friendly” and “green.” I call BS and I see that this company has decided to pivot to this extraction method because it will quickly make them back their investment.

Communities near and far live without clean drinking water and sacrificing said water for “greener” tech, is not the solution.

I oppose this project am hopeful the CEC will do the same,

Marisa Loreno
