A quick email expressing my hopes that you will choose the side of caution and prevent the silica mining from going forward.

Failing that, I hope you will severely limit it.

Failing that, I hope you will create long lasting, complete, and harsh legal implications without loopholes for the company, the individuals involved in overseeing the the company, and stakeholders who profit from the risk (e.g any shareholders).

Despite best efforts and smooth talking, I am convinced that the long term costs and risks of this project to our people and our province will outweigh the benefits and it should not go forward.

Sincerely,  
Jim Appleby
