Hello,

I'm writing to the Clean Environment Commission to oppose Sio Silica's Silica Sand Extraction Project in southeastern Manitoba.

The mining technique proposed by Sio Silica is untested and unproven, and risks the only source of drinking water for thousands of Manitobans. Not only does this project threaten the quality of our drinking water, but it also threatens the integrity of the aquifer itself.

Communities across the world struggle to access clean drinking water — we shouldn't be risking ours for profit.

Sincerely,

Leah Lazarenko
Winnipeg, MB
