To who it may concern,

We are very concerned about the impact that the proposed silica sand project near Vivian MB will have on the water we drink and air we breathe in southeastern Manitoba.

We are citizens of Springfield. We love our lives here. We love the quality of our water and the fresh air. We love the abundant wildlife and the pristine nature that surrounds us.

We beg of you as experts and professionals, to do your due diligence to ensure that we protect these essential resources today and for the future.

The economic gain should never be more important than the state of our environment. We should not gamble, nor take any risk that impact our environment. We need to be responsible citizens and realize these resources are priceless. Once gone they will never be replaced.

Sincerely,

Andrea and John Richter
