Hello,we reside in the rm of Springfield. It is very difficult to comprehend that in this day and age with our environment being threatened daily that there would be any consideration to allow a project of the magnitude of "Sio Sands". 2 years ago when we were in the midst of a drought water or the lack of it gave our province a reality check that clean water is a finite product. Why would any level headed person with a lick of common sense that should be doing good for our fellow man give this project a second thought?!! Furthermore , the trade off of " jobs" versus our environment is old school. There are plenty of good paying jobs that cannot be filled as it is, so please do not consider this as a reason to approve this project. Our children and their children should not have to suffer the consequences of bad decisions made by the authorities having jurisdiction in the process at hand . WATER is LIFE ! Please use common sense and deny the Sio Sands project. Thank you. Kelly and Deb Shymko. LorneHill rd Sunnyside Mb
