Hello . I'm not a good speaker , and I'm not very good at giving my opinion . But saving our clean water is extremely important! Is it not our responsibility to leave future generations, (our children and grandchildren) a clean and safe environment ? Yes there is money to be made for a handful of people. But over a period of 25 yrs and thousands of wells being drilled , there are bound to be accidents and mistakes made . Once the water is contaminated, it's done for good . Those who benefit from the project won't be around to clean up their mistakes , or care about them ! It is up to our generation to respect what the earth has given to us , and not exploit it for monetary gains !!! Please say NO to SIO !! And YES to clean air and water . Let future generations look up to us ,and respect our decisions . And say Thank you
