To Whom it may concern,

My name is Joshua Mustard, I'm here to voice my concerns like most residents of the R.M. Of Springfield. I'm a long time resident, a family man of 8 kids and a proud Metis.

I understand the invested interest of Can White now Sio Silica, but I also have invested interest in my family, property, and community.

As a professional I work as a unionized industrial worker. I've had the privilege to partake in three multibillion dollar legacy projects. As well as multiple industrial sites across most of Canada and into the far north. I've been involved in refineries in oil, fertilizer, natural gas, pulp and paper, and hydro.

I would like to say that they are all safe, but I have seen irreparable damage to wild life, environment, and humans. Accidents do happen and a lack of accountability takes place.

The blunder of trees is nothing, the blunder of possibly damaging drinking water which is a source of life is traumatic. I have seen what a billion dollars buys and it is not a lot.

I think we as the people need to hold others accountable for their actions.

Water is life and needs to be protected.

I haven't seen any studies that have been done on a project like this. I need hard evidence to believe.

All I hear is trust the process, I'm not convinced.

I am a concerned resident

Joshua Mustard
