Interlake Spectator

Letter to The Editor

Dear Editor

The Research crew of the Namao that is set to sail Lake Winnipeg this summer to further investigate the pollution dilemma. I'm sure we will be told that Lake Winnipeg is polluted. But Lake Winnipeg is not the polluter.

What is needed , are some of the crews of investigators to scour the Province for those who are. A good place to start is right here in Interlake region the RM's of Bifrost, Armstrong and Fisher.

Investigate every producer of Hogs, Cattle, Chickens, Turkeys, Dairy and find out how some farms are disposing of their manure, where is it placed, where has it been placed in the past, exactly how is it disposed of? I'm sure we will then see a improvement in the colour of some ditches and other water courses. Thus reducing the Lake's added pollution, be it in large or small amounts.
