Subject: CEC

Hello Cathy;

In respect to ungoing submissions to CEC, I would like to bring this issue to the forefront . Minister Steve Ashton while Conservation Minister is on record that the Province will have to bring the values of Lake Winnipeg to 1970 Standards!(His contribution has brought this to the CEC standards !) In light of probable expansion of the Hog Industry, depending on the Election, I request that his Public Promise be honored by the CEC to the fullest in any event. Those were bold words and have to be considered by the CEC. I also ask that the Moratorium stay in place for good. There , obviously already is enough problem that Government cannot solve. Hearings on a different level should be held to solve the current problems that all Maniobans face. It appears that the Manitoba Public would be the only body to remedy the current situation since the Government has dismally failed in all of it's promises and obligations to a Healthy, Clean Environment. It is our sincere hope that the position of the Enviroment is on the front burner during this Election period. Enough is too much when it comes to our Health. Who ever allowed this to happen and esculate without any responsibilities in the first place ?? I , for one can name a few.

Thanks,
joe leschyshyn
