

MAY 02 2007

Attention: MB-Clean Environment Commission

Dear sirs:

I am a producer in the southwest corner of Manitoba. My son and I have a cattle and grain farm. As you contemplate putting more regulations and expense for the farm sector keep in mind that margins for both cattle and grain have been virtually non-existent in the past few years. The Feds have imposed an environmental plan that will cost the oil seeds 50¢/bushel to comply with. No problem with the margins they receive. Impose a \$1000 regulation on a farmer and you may be taking all the margin he has.

Sorry about the scribbles - I'm busy
