To Manitoba Clean Environment Commission

I have been a farmer all my life. We have always been conscious of the Land and the rules associated with hog farming.

It was devasted when a moratorium was placed on the construction of hog barns.

I have spoken to many farmers who are feeling as I am which is uncertain about our future as hog farmers.

The pause on the industry seems very unfair especially considering how little phosphorus we are responsible for.

Don't get me wrong, we care about the environment and clean drinking water, but the way this moratorium has taken place is very unfair.

One thing is for sure, we don't need anymore rules, we already have ~~so~~ many ~~rules~~ to keep track of.

I ask you to end this moratorium as it is really hurting us farmers and doing so needlessly.

Thank you
Dave Wiche
