Comment :

I would like to register my vehement opposition to any expansion of hog production in this province. I am appalled that even though evidence from other countries indicates that hog production devastates the water table and has caused many other communities to ban hog production, this province is even considering allowing expansion. This industry is designed to make a few people wealthy at the expense of ruining our fragile environment. I am also opposed to the inhumane conditions these animals are forced to exist in before being taken to slaughter.
