Subject: NO more Regulations

Dear Madam:

We are pleading to you: what we need is more **time** to adjust to the new rules that we already have, and **government funding** to help us out, **not** more regulations. We farmers care about the environment, as we live directly from it. There is seldom a job that is more down to the dirt than ours. We are proud to be farmers and want others to be proud of us too. There is now way we want to hurt the environment on purpose, we want to keep it as new as we can for our kids and grandkids too. I know we don't need more rules to tell us what to do, we are smart enough to have figured it out our selves by now.

Thank you for taking the time and reading to the very end.

Sincerely Urs and Marianne Isenschmid (proud Dairy farmer s) of Manitoba
