COMMENTS:

To Whom It May Concern,

Springtime is a very busy time for farmers but we feel it is necessary to take a few minutes to express our concerns to you.

Please do not place any more rules or regulations on us. Farmers care about the environment. We are already doing things to protect our precious soil & water on our farm. If it isn't healthy, we can't make a living! There are enough rules & regulations now that we are following. If you introduce more we will need time & government funding to adjust.

Sincerely,

Michael & Danica Chevalier
