Re: MB Hydro Manitoba – Minnesota Transmission Line

The Rural Municipality of Piney would like to voice our concerns to the Clean Environment Commission if the Manitoba Hydro MB – MN Transmission Line changes location. Currently our municipality does not have significant issues with the proposed route, but if changes are made to the location of the line, some of our ratepayers in our municipality may be adversely affected by these changes or have new issues.

In order for the process to remain equal, we request that the public consultation start over in order for the process to remain fair to all parties affected by the relocation. If you have any questions in regards to this matter, please contact the RM office at 204-437-2284.

Sincerely,

A handwritten signature in blue ink, appearing to read 'W. Anderson', is written over a light blue horizontal line.

Wayne Anderson
Reeve, RM of Piney
