Manitoba Clean Environment Commission

Annual Report 2014-2015

**MINISTER OF
CONSERVATION AND WATER STEWARDSHIP**

Legislative Building
Winnipeg, Manitoba, CANADA
R3C 0V8

Her Honour
The Honourable Janice Filmon, C. M., O. M.
Lieutenant-Governor of Manitoba
Room 235 Legislative Building
Winnipeg, Manitoba
R3C 0V8

Your Honour:

The undersigned has the honour to present the Annual Report of the Clean Environment Commission detailing its activities for the fiscal year ending March 31, 2015.

Sincerely,

Tom Nevakshonoff
Minister

Office of the Chairperson

305 – 155 Carlton Street
Winnipeg, MB R3C 3H8

The Honourable Tom Nevakshonoff
Minister of Conservation
Room 333 Legislative Building
Winnipeg, Manitoba
R3C 0V8

Dear Mr. Nevakshonoff:

Pursuant to the provisions of Section 6(10) of *The Environment Act* I am pleased to submit to you the Commission's annual report for the year ending March 31, 2015.

Submitted on behalf of the Commission.

Terry Sargeant
Chair

The Manitoba Clean Environment Commission

The Minister responsible for *The Environment Act* during the 2014-2015 fiscal year was the Honourable Gord Mackintosh. Commission membership consisted of a full-time Chairperson and citizen appointees. They were:

Terry Sargeant (Chairperson)

Judy Bradley

Kenneth Gibbons (until June 2014)

Ian Halket (until June 2014)

Judy Head

Brian Kaplan

Gerard Lecuyer (until June 2014)

Patricia MacKay

Aurelie Mogan

Wayne Motheral

John Neufeld

Reg Nepinak

Wayne Sato (until June 2014)

Jim Shaw

Muriel Smith

Bev Suek

Ken Wait (until June 2014)

Edwin Yee

Role and Responsibilities

Mandate

The Clean Environment Commission is established under *The Environment Act* (1988) to provide an avenue through which the public can participate in the decision making process regarding the environment in Manitoba. The Commission also provides advice and recommendations to the Minister and plays a role in the application of *The Contaminated Sites Remediation Act* and *The Drinking Water Safety Act*.

Commission membership includes a full-time Chairperson and part-time Commissioners appointed by Order-in-Council. Commissioners come from a wide variety of backgrounds and disciplines as well as different regions of the province.

The Commission may engage in the following activities to assist in environmental management.

Public Hearings

As part of the provincial environmental assessment process, the public is invited to submit comments and/or objections regarding a proposed project through the Public Registry. In response to valid concerns, the Minister of Conservation may request the Clean Environment Commission to convene a public hearing. During such a hearing the Commission receives representations from the project proponent and the general public-both supporters and opponents. The Commission reviews the evidence and information presented at the hearing and prepares a report containing advice and recommendations for the Minister.

Upon receipt of the Commission's report, the Minister may choose to accept all or part of its recommendations but is under no legal obligation to do so. If, however, the Commission's recommendations are not acted upon, or incorporated into the licence under review, written reasons must be provided by the Minister or the Department of Conservation and Water Stewardship and these must be filed in the Public Registry.

In addition to licensing matters, some environmental issues require public involvement before government policy can be developed. In these cases, the Minister of Conservation can request that the Commission convene a hearing to gather public opinion.

Manitoba Conservation has also signed onto a Canada-Manitoba Agreement on Environmental Assessment Cooperation with Environment Canada. As part of this agreement, regarding

projects where there is also federal jurisdiction, a process is set out respecting joint review. Commission hearings may be used as a source of information for the federal review or there may be a joint review panel formed for specific projects. Commission members would be part of these panels.

Investigations

The Environment Act allows the Commission to investigate any matter of environmental concern and to provide advice and recommendations to the Minister of Conservation.

Mediation

The Commission can provide mediation services to parties involved in an environmental management dispute. These activities are undertaken at the request of the Minister of Conservation. The Commission reports to the Minister regarding the outcome of any mediation exercises in which it becomes involved.

Rôle et responsabilités

Mandat

La Commission de protection de l'environnement a été établie en vertu de la *Loi sur l'environnement* (1988) afin d'offrir un moyen au public de participer au processus décisionnel en ce qui a trait à l'environnement au Manitoba. La Commission fournit aussi des conseils et des recommandations au ministre et joue un rôle dans l'application de la *Loi sur l'assainissement des lieux contaminés* et *Loi sur qualité de l'eau potable*.

La Commission est composée d'un président à plein temps et de commissaires à temps partiel nommés par décret. Les commissaires représentent des disciplines et des horizons différents et viennent aussi de différentes régions de la province.

La Commission peut entreprendre les activités suivantes afin d'aider à la gestion environnementale :

Audiences publiques

Dans le cadre du processus d'évaluation environnementale provinciale, on invite le public à présenter des commentaires ou des objections concernant un projet proposé par le truchement du registre public. En réponse à des préoccupations justifiées, le ministre de la Conservation peut demander à la Commission de protection de l'environnement d'organiser une audience publique. Pendant une telle audience, la Commission reçoit des observations du promoteur du projet et du grand public (partisans et opposants). La Commission examine les éléments de preuve et les renseignements présentés lors de l'audience et prépare un rapport contenant des conseils et des recommandations à l'intention du ministre.

Une fois qu'il a reçu le rapport de la Commission, le ministre peut choisir d'accepter une partie ou la totalité des recommandations, mais n'est nullement tenu de le faire en vertu de la loi. Cependant, si aucune mesure n'est prise suite aux recommandations de la Commission, ou si ces dernières ne sont pas incorporées dans la licence examinée, le ministre ou le ministère de la Conservation and Water Stewardship doit fournir des raisons écrites qui seront versées dans le registre public.

En plus des questions de licence, certaines considérations environnementales requièrent la participation du public avant qu'une politique gouvernementale puisse être élaborée. En pareil

cas, le ministre de la Conservation peut demander à la Commission d'organiser une audience afin de recueillir l'opinion du public.

Conservation Manitoba a aussi signé une Entente Canada-Manitoba d'harmonisation de l'évaluation environnementale avec Environnement Canada. Dans le cadre de cette entente, lorsqu'un projet relève aussi du gouvernement fédéral, un processus est établi relativement à un examen conjoint. L'examen fédéral peut utiliser les audiences de la Commission comme source de renseignements, ou on peut créer un comité d'expertise conjoint pour des projets précis. Les membres de la Commission font alors partie de ces comités.

Enquêtes

La *Loi sur l'environnement* autorise la Commission à procéder à des enquêtes à l'égard de questions portant sur l'environnement et à fournir des conseils et des recommandations au ministre de la Conservation.

Médiation

La Commission peut fournir des services de médiation à des parties opposées dans un différend portant sur la gestion environnementale. Elle entreprend ces activités à la demande du ministre de la Conservation, puis lui rend compte des résultats de chaque médiation.

Message from the Chairperson

The year 2014-15 continued in the same fashion as the past few years, in being a very busy one for the Commission.

For the past four years, since the Lake Winnipeg Regulation (LWR) reference of July 2011, the work of the Commission has been almost exclusively involved with Manitoba Hydro projects. Most of the year 2011-12 was initially consumed with preparing for the LWR proceedings; and, later, with Bipole III Transmission Project preparations. The Bipole III proceedings covered the better part of the year 2012-13. The proceedings for the Keeyask Generation Project took up most of the year 2013-14, with the report being filed early this year, 2014-15. The Keeyask proceedings are described in more detail in this report.

After that report was concluded and delivered to the Minister, the Commission turned once again to the deliberations for Lake Winnipeg Regulation. Preparatory work continued until December 2014. Hearings commenced in January 2015 and were still continuing past the end of the reporting year. The proceedings will be described in next year's report.

As I have written in past reports, the Clean Environment Commission takes very seriously the important role in environmental protection given it by *The Environment Act* of Manitoba. The Commission seeks to fulfill this mandate, in part, by offering advice that we believe will contribute to improving the art and science of environmental assessment, which, in turn, will better protect the environment.

Positive steps in this regard continued in the past year. As I reported last year, the minister accepted all of the advisory recommendations that were in the Bipole report. These included a recommendation to conduct a regional cumulative effects assessment of hydroelectric development in northern Manitoba, a recommendation the Commission believes to be key to future environmental protection in northern Manitoba. The Commission is pleased that work on this initiative, which has been ongoing for more than a year, will be concluded by the end of 2015.

The Commission also notes that other important policy and legislative initiatives, at least in part, sparked by past Commission recommendations have been undertaken by the Province. These and other initiatives lead the Commission to believe that environmental assessment in Manitoba appears to be headed in a very positive direction.

There were a number of changes to Commission membership in the past year. Due to a recent policy change, members, with some exceptions, are limited to a ten-year term limit. As a result, Kenneth Gibbons, Ian Halket, Gerard Lecuyer, Wayne Sato and Ken Wait left the Commission. New appointments include: Neil Harden, John Neufeld and Beverly Suek.

We were very saddened to learn recently that long-time and valued member of the Commission Ken Wait had passed away after a relatively short illness. The Commission extends its condolences to Ken's family.

As always, the Commission looks forward to continuing to play its role in ensuring the environmental protection of Manitoba in the coming year.

Terry Sargeant

Message du président

Comme au cours des récents exercices précédents, la Commission a été très occupée pendant l'exercice 2014-2015.

Ces quatre dernières années, depuis le renvoi de juillet 2011 visant la régularisation du lac Winnipeg, le travail de la Commission a porté presque exclusivement sur des projets d'Hydro-Manitoba. La majeure partie de l'exercice 2011-2012 a été consacrée, tout d'abord, à la préparation des délibérations relatives à la régularisation du lac Winnipeg et, par la suite, aux préparations visant le projet de ligne de transmission Bipolaire III. Les délibérations relatives à Bipolaire III ont occupé la majeure partie de l'exercice 2012-2013. Les délibérations touchant le projet de centrale de Keeyask ont occupé la majeure partie de l'exercice 2013-2014, et le rapport a été déposé au début du présent exercice (2014-2015). Les délibérations au sujet du projet Keeyask sont décrites plus en détail dans le présent rapport.

Une fois le rapport terminé et remis au ministre, la Commission a repris ses délibérations visant la régularisation du lac Winnipeg. Les travaux préparatoires se sont poursuivis jusqu'en décembre 2014. Les audiences ont commencé en janvier 2015 et se poursuivaient encore après la fin de l'exercice visé par le présent rapport. Les délibérations seront décrites dans le rapport du prochain exercice.

Comme je l'ai écrit dans de précédents rapports, la Commission de protection de l'environnement prend très au sérieux le rôle important de protection de l'environnement que lui confère la *Loi sur l'environnement* du Manitoba. La Commission s'efforce de remplir son mandat en partie en donnant des conseils qui, pensons-nous, contribueront à améliorer l'art et la science de l'évaluation environnementale, laquelle, à son tour, améliorera la protection de l'environnement..

Des avancées positives à cet égard ont continué de se produire au cours du dernier exercice. Comme je l'indiquais l'année dernière, le ministre a accepté toutes les recommandations du rapport sur le projet Bipolaire, y compris celle préconisant d'évaluer les effets régionaux cumulatifs du développement hydroélectrique dans le nord du Manitoba, une

recommandation qui, de l'avis de la Commission, est essentielle à la protection environnementale future du nord du Manitoba. La Commission est heureuse d'annoncer que le travail effectué dans le cadre de cette initiative depuis plus d'un an sera terminé d'ici la fin de 2015.

La Commission constate également que la Province a entrepris d'autres initiatives importantes en matière de politiques et de mesures législatives qui découlent, au moins en partie, de recommandations formulées par la Commission. Ces initiatives, parmi d'autres, incitent la Commission à penser que l'évaluation environnementale au Manitoba semble prendre une direction très positive.

Il y a eu des changements concernant les membres de la Commission l'année dernière. À la suite d'un récent changement de politique, la durée du mandat des membres, à quelques exceptions près, est limitée à dix ans. En conséquence, Kenneth Gibbons, Ian Halket, Gérard Lecuyer, Wayne Sato et Ken Wait ont quitté la Commission. Neil Harden, John Neufeld et Beverly Suek ont été nommés à la Commission.

C'est avec beaucoup de tristesse que nous avons appris récemment le décès, après une maladie relativement courte, de Ken Wait, membre de longue date, unanimement apprécié, de la Commission. La Commission présente ses condoléances à la famille.

Comme toujours, la Commission se réjouit à l'idée de continuer l'année prochaine à jouer son rôle visant à garantir la protection de l'environnement du Manitoba.

Terry Sargeant

Hearings

Lake Winnipeg Regulation

On July 5, 2011, the Minister of Conservation, at the request of the Minister of Water Stewardship, issued a reference to the Clean Environment Commission regarding the regulation of Lake Winnipeg under *The Water Power Act*. The Commission has been asked to review the application by Manitoba Hydro for a final licence for the project. The request included the following Terms of Reference:

1. Review the broader public policy rationale regarding the regulation of lake levels on Lake Winnipeg in effect at the time leading up to the issuance of the Interim Licence in 1970.
2. Hear evidence from Manitobans regarding the effects and impacts of Lake Winnipeg regulation since the project was put into commercial use by Manitoba Hydro on August 1, 1976.
3. Review the successes and failures of the implementation of those broader public policy goals that led up to the issuance of the Interim Licence and the construction and subsequent operation of the project.
4. Summarize and make comment on the concerns raised pertaining to the issuance of a final licence to Manitoba Hydro under *The Water Power Act* including but not limited to future monitoring and research that may be beneficial to the project and Lake Winnipeg.

Planning for this project began in 2011-2012 and it was soon realized that additional information would be required to undertake a review that included the components set out in the Terms of Reference. The Commission requested this additional information from Manitoba Hydro. A report with the requested information was delivered to the Clean Environment Commission on July 31, 2014. The result of the hearing will be reported on in a future annual report.

Keeyask Generation Project

A public hearing on the Keeyask Generation Project began in the 2012-2013 fiscal year and was completed in 2013-2014. The hearing took place starting in September 2013 and ending in January 2014. During this period, visits to six communities with an interest in the project were

undertaken, as well as hearings in Winnipeg. The report and recommendations were delivered to the Minister of Conservation and Water Stewardship in April 2014.

The Keeyask Hydropower Limited Partnership (the Proponent), a partnership between Manitoba Hydro, Tataskweyak Cree Nation, War Lake First Nation, Fox Lake First Nation and York Factory First Nation, proposed to build a generating facility with association dams, dykes and spillway on the Nelson River at Gull Rapids, immediately upstream of Stephens Lake, near Gillam.

On November 14, 2012, the Minister of Conservation provided a reference to the Clean Environment Commission requesting that it conduct public hearings on the proposed Keeyask Generation Project. The request included the following Terms of Reference:

1. To review the EIS, including the proponent's public consultation summary. Note that a detailed technical review will be done by the provincial and federal specialist agencies who are members of the TAC. As such, documents produced during this assessment should be considered by the Commission as input for the hearings;
2. To hold public hearings for the Commission to consider stakeholder and public input;
3. To prepare and file a report with the Minister of Conservation and Water Stewardship outlining the results of the Commission's review and providing recommendations for the Minister's consideration.

The five-person hearing panel consisted of Mr. Terry Sargeant (Chairperson), Judy Bradley, Reg Nepinak, Jim Shaw and Edwin Yee.

The Commission conducted 39 days of hearings in Gillam, Bird, York Landing, Thompson, Split Lake, Cross Lake and Winnipeg. The hearing began on September 24, 2013 and the record was closed January 13, 2014. Partnership representatives, participants and presenters made statements and were questioned by the Commission panel.

The Commission used two different terms to describe members of the public who participated in the hearing process: Participants and Presenters. Participants were organizations and their representatives who were involved in both the pre-hearing processes and the formal hearing proceedings. Aside from making presentations at the hearing, many Participants retained experts to make submissions on particular topics and issues, and participated in questioning of the Proponent. Presenters were organizations and members of the public who attended and spoke only during the formal hearing proceedings. To allow meaningful participation in the hearing,

seven different Participants received a total of \$1.6 million in funding through the Participant Assistance Program. The Panel heard from 43 witnesses called by the Proponent, 69 witnesses called by the Participants and statements from 79 Presenters. The Commission also received 28 written submissions.

The Environmental Impact Statement (EIS), provided for this project was new and innovative for Manitoba, in that it included separate, community led assessments by the Cree Nation communities. In addition, there was an attempt on behalf of the Proponent to integrate the Aboriginal Technical Knowledge, collected in the community assessments, with the standard technical scientific information gathered for an EIS.

Although there was some concern expressed that the scientific information dominated the decision making, the Panel found the community assessments valuable in understanding the effects of the project as well as the cumulative effects of past projects, on the local communities.

The Commission also heard many other issues raised, some regarding the proposal under review as well as concerns with previous Manitoba Hydro projects and their past, on-going and cumulative impacts on northern residents and the environment.

The Commission recommended that an *Environment Act* licence be issued. A total of 26 recommendations were made to the minister. Some of these related directly to the proposal, the Proponent's environmental assessment methodologies and the provincial environmental review process.

Recommendations provided guidance on the mandated issues such as, lake sturgeon recovery and woodland caribou management and suggested improvements to the environmental assessment process, particularly cumulative effects assessment.

The Commission recommends that:

12.1 The Manitoba Government establish provincial guidelines for cumulative effects assessment best practices and include specific direction for proponents in project guidelines.

Investigations

No investigations took place in 2014/15.

Other Activities

Professional Development and Training

Commission members and staff attended workshops and conferences that provided professional development in the area of tribunals and hearings, environmental assessments and current environmental topics and issues. Examples of the workshops and conferences included: 30th Annual Canadian Council on Administrative Tribunals Conference, Manitoba Council of Administrative Tribunals (MCAT) Ninth Annual Conference, Supreme Court Justice Rothstein presentation and an internal workshop on water quality in the Lake Winnipeg Basin.
